## Meeting Postponed

The meeting of the Western Petroleum Refiners' association, which had been scheduled to be held at Kansas City Saturday, has been postponed until Tuesday of next week. This is because of the three days of Easter and the disappearance of many of the members to be away on Easter morning.

The meeting was made by W. S. Turner, president of the association after a consultation held with all who were present some of the leading refiners, including Messrs. Thwing and Clegg, of Kansas City, and E. Constantine of Tulsa. It is too important to neglect to have anything interfere with the full attendance.

At the meeting Tuesday a selection of a secretary to act as Secretary of State will be appointed to account the secretarieship of the petroleum institute will be made. There seems to be quite a few contenders among the aspirants for the position. There is much good timber to select from and the question is only one as to the man who can be of the greatest benefit to the organization.

The meeting will be a large one and that great harmony will prevail is evident from the fact that Messrs. Clegg and Thwing have been devoting much valuable time to a canvass of the situation. It seems to be the consensus of opinion among them all that never in the history of the mid-continent fields was there greater necessity for an active and aggressive organization.

## W. S. Turman in Tulsa

W. S. Turman, of the Turman oil company, is in Tulsa and says that he expects to drill a great many wells during the coming spring in the vicinity of the Wilcox well in 30-15-11, where he holds much liability.

He is also drilling two wells and starting another in 30-15-11, where he adjoins the Texas company, Williams, Producers & Refiners, the Prairie Oil & Gas and the Livingston Brothers. His No. 2 well on the Carter farm, in 30-15-14, is down about 1,000 feet and he is preparing to drill several more on his various holdings.

## At Burk Burnett

The Gilliland oil company No. 6, which is the third location north of the southwest corner of the lease, is drilling in sand and showing for a bit well. The Gilliland people now have five wells that are making 5,100 barrels between them.

**Cotton County Report.** In spite of the fact that the wells in Cotton county have not been developing into anything startling, the Alberney well having proved a failure in the sand at 1,600 feet, operations are going forward and the various companies evidently expect to test the country thoroughly before giving up.

Latest reports as of yesterday of the finding of a showing of oil in the Burk-Waggoner well in block #4 Red River lands, two miles northwest of Burk-Burnett on the top of the sand mounds, the land looks a little more promising, but the fact remains that nothing startling has developed so far.

The Texas California oil company's No. 1 well, shown in the southwest corner of the northwest of the south of the south of 30-15-14, is a big up and the others are being moved in.

The Carter-Roberson oil company No. 1 on Indian land in the northeast corner of the southwest of the

total depth of the well. It is an oil dry hole but may be drilled deeper.

In the same section, N. Y. and others, Sonny Wolf in the northwest corner of the northeast of the southwest of the northeast of 30-15-14 is being cleaned out at 3,715 feet.

The Chandler-Clegg oil company No. 1 on Indian land in the northwest of 30-15-14, is being drilled in the hole which is in the hole of 2,430 feet.
